

NestApp

Full UI/UX Revamp Plan — All Sessions

A complete redesign of every screen, shared component, and design system for a Gen-Z-attractive, culturally resonant community app serving Indian, Pakistani, Nepalese, and Arab communities in the USA.

Prepared: June 2026 | Stack: Expo · React Native · Supabase · Zustand

1. Design Identity

Tagline: Where culture meets community

Design Language: "South Asian Luxe" — warm saffron gold + deep jewel tones + glassmorphism + soft gradients. Think Airbnb warmth meets Revolut elegance meets BeReal playfulness.

Color Palette

Role	Name	Hex
Primary	Saffron Gold	#F4A833
Secondary	Deep Indigo	#2D1B69
Accent	Rose Coral	#FF6B6B
Surface	Warm White	#FEFAF4
Card BG	Soft Cream	#FFF8EE
Dark BG	Midnight Indigo	#0F0A1E
Dark Card	Deep Purple	#1A1035
Success	Jade	#00C48C
Info	Sky	#0099FF

Typography

Display: Nunito (rounded, friendly, Gen-Z)

Body: Inter (clean, legible)

Accent: Playfair Display (for cultural/elegant headings)

Visual Language

- Cards: Floating with soft shadow + 16–20px radius
- Gradients: Saffron→Coral, Indigo→Purple on headers and CTAs
- Glassmorphism: Frosted glass nav bar and modal backgrounds
- Micro-animations: Reanimated spring/bounce on every interaction
- Haptics: expo-haptics on key taps
- Icons: @expo/vector-icons + custom SVG emoji-style icons per section

2. New Bottom Navigation

Floating pill-shaped glassmorphic nav bar (not full-width). Active tab: color fill + label appears + scale bounce.
Unread badge on Messages: pulsing red dot.

Tab	Icon	Label	Accent Color
Home	Flame / Home	Feed	#F4A833 Gold
Market	Shopping Bag	Classifieds	#FF6B6B Coral
Carpool	Car	Rides	#00C48C Jade
News	Spark / Lightning	Stories	#0099FF Sky
Inbox	Chat Bubble	Messages	#9B59B6 Purple

3. Screen-by-Screen Revamp (24 Screens)

Auth Screens (Login & Signup)

- Full-screen gradient hero (saffron → coral → indigo) with animated geometric/mandala background
- Large centered logo with glow effect
- Floating glassmorphic card input fields
- Social sign-in buttons (Google, Apple) with pill shape
- Smooth slide-up keyboard animation
- "Continue as Guest" ghost button

Home Screen

- Sticky Header: Greeting + city selector pill + notification bell + avatar
- "What's happening in [City]" — horizontal 3D-tilting event cards with gradient overlays
- Quick Actions Row — pill buttons: Post Listing · Share Ride · Write Story · Start Chat
- Featured Listings — horizontal cards with image, price badge, heart button
- Nearby Rides — map-style card with pickup/dropoff visual
- Community Pulse — latest news cards with category chips
- New Members — horizontal avatar scroll (like Twitter Spaces)
- Points & Reputation — gamified progress bar card

Classifieds — Browse

- Sticky rounded search bar with filter icon
- Category chips row (scrollable): Electronics · Furniture · Cars · Jobs · Services · Food · Events · Housing
- Grid/List toggle — Pinterest masonry OR clean list
- Each card: image, title, price badge, location dot, time ago, heart + share
- Pull-to-refresh with custom lotus spinner animation

Classifieds — Listing Detail

- Full-bleed image carousel with dots + pinch-to-zoom
- Floating bottom sheet with price, title, seller card
- Animated "Contact Seller" CTA button with shimmer effect
- Share sheet with custom preview
- Related listings horizontal scroll

Classifieds — Post & Edit Listing

- Step-by-step wizard: Photos → Details → Preview
- Drag-and-drop photo reorder
- Smart category suggestions
- Preview card before publish

Carpool — Browse Rides

- Map-first layout with mini static map on each card
- Route visualization: FROM → TO with animated dotted line
- Filter bar: Today · This Week · Long Distance
- Ride card: avatar, name, route, seats, price, rating stars

Carpool — Ride Detail

- Full route map view
- Driver profile card (rating, trips, member since)
- Interactive seat selector dots
- Real-time seat availability counter

Carpool — Post & Edit Ride

- Map-based from/to picker
- Animated seat count selector
- Price per seat calculator
- Custom styled scheduled departure time picker

News — Feed

- Instagram Stories-style horizontal circles at top (community highlights)
- Card feed: large hero image, category chip, title, author avatar, read time
- Category filter chips: All · India · Pakistan · Nepal · Arab · Local · Events
- Trending hashtags row
- Bookmark + share on each card

News — Detail & Post

- Full-bleed header image
- Author card with follow button
- Rich text content with related articles
- Comment section (threaded)
- Rich text editor with photo upload, crop, category, tags, publish/draft

Messages — Conversations

- Large avatar with online indicator dot
- Last message preview + unread count badge
- Swipe actions: Archive · Delete · Mute
- Fuzzy search bar
- Empty state with warm illustration + "Start connecting" CTA

Messages — Chat

- Gradient bubbles for sent messages
- Long-press emoji reactions
- Inline image sharing
- Animated typing indicator (three dots)
- Voice message button
- Read receipts (double tick)

Profile

- Gradient hero with editable avatar
- Stats row: Listings · Rides · Stories · Rating
- Reputation badge: Bronze / Silver / Gold / Diamond (points-based)
- Tabs: Activity · Listings · Reviews

Settings

- Grouped sections with icons and chevrons
- Animated Dark/Light/Auto theme toggle (sun/moon)
- Notification preferences per feature
- Language preference: English, Hindi, Urdu, Nepali, Arabic
- Privacy controls + logout with confirmation sheet

4. New Features & UX Improvements

Feature	Inspired By
Onboarding flow (3 animated slides)	Duolingo
Skeleton loading screens	LinkedIn
Pull-to-refresh custom animation	Twitter
Empty states with illustrations	Slack
Toast notifications (slide-up)	iOS native
Haptic feedback on key actions	iPhone
Search with filters (classifieds + rides)	Airbnb
Image lazy loading with blur placeholder	Medium
Offline banner	Gmail
Points/Gamification progress on Home	Duolingo
Verified badge for active members	Twitter
Report/Flag content (safety)	Reddit
Share listing to external apps	Marketplace
Community category filter everywhere	Nextdoor
Deep linking support	Airbnb

5. New Shared Components to Build

GradientHeader — Reusable gradient top section with title, back button, avatar

FloatingTabBar — Custom glassmorphic bottom navigation pill

FeatureCard — Reusable card with image, title, meta, actions

CategoryChips — Horizontal scrollable filter chips

AvatarStack — Overlapping avatar group (New Members, etc.)

SkeletonLoader — Animated shimmer loading placeholder

ToastNotification — Slide-up toast for success/error/info

EmptyState — Illustration + headline + CTA button

SearchBar — Rounded search input with filter button

StepProgress — Wizard step indicator for multi-step forms

BadgeChip — Colored label chips (category, status)

PulsingDot — Animated online/unread indicator

6. New Packages to Install

expo-font — Nunito + Inter custom fonts

expo-haptics — Haptic feedback on interactions

expo-linear-gradient — Gradients throughout the app

expo-blur — Glassmorphism effects

lottie-react-native — Lottie animations (loading, empty states, onboarding)

react-native-toast-message — Slide-up toast notifications

7. Implementation Session Plan

Each session is a separate Claude Code conversation. Start a new chat, say "start session N" and Claude will pick up exactly here.

Session 1: Theme + Foundation

- Install new packages: expo-font, expo-haptics, expo-linear-gradient, expo-blur, lottie-react-native, react-native-toast-message
- Rewrite core/theme/index.js — new color palette, typography scale, spacing, shadows
- Load custom fonts (Nunito, Inter) in App.js
- Build FloatingTabBar component (glassmorphic pill, animated active state)
- Build GradientHeader shared component
- Build SkeletonLoader, ToastNotification, EmptyState, BadgeChip, CategoryChips, SearchBar, PulsingDot, AvatarStack, StepProgress
- Update core/navigation/index.js to use new FloatingTabBar

Session 2: Auth Screens + Home Screen

- Rebuild LoginScreen — gradient hero, mandala background, glassmorphic inputs, Google/Apple sign-in
- Rebuild SignupScreen — same design language, step validation
- Rebuild HomeScreen — sticky header, quick actions, featured listings, nearby rides, community pulse, members scroll, points card

Session 3: Classifieds (All 4 Screens)

- Rebuild BrowseListingsScreen — search bar, category chips, masonry grid, card design
- Rebuild ListingDetailScreen — image carousel, bottom sheet, seller card, related listings
- Rebuild PostListingScreen — 3-step wizard, drag-drop photos, preview
- Rebuild EditListingScreen — same wizard pattern pre-filled

Session 4: Carpool (All 4 Screens)

- Rebuild BrowseRidesScreen — route cards, map previews, filters
- Rebuild RideDetailScreen — map view, driver profile, seat selector
- Rebuild PostRideScreen — map picker, seat selector, price calculator
- Rebuild EditRideScreen — pre-filled version of PostRide

Session 5: News + Messages

- Rebuild NewsFeedScreen — stories circles, card feed, category chips, trending
- Rebuild NewsDetailScreen — full bleed image, author card, comments
- Rebuild PostNewsScreen — rich text editor, photo upload, tags
- Rebuild ConversationsScreen — avatars, swipe actions, search, empty state

- Rebuild ChatScreen — gradient bubbles, reactions, typing indicator, voice, read receipts

Session 6: Profile, Settings & Polish

- Rebuild EditProfileScreen — gradient hero, avatar upload, stats row
- Rebuild SettingsScreen — grouped sections, theme toggle, language, notifications
- Rebuild MyListingsScreen and MyRidesScreen
- Add onboarding flow (3 animated slides shown on first launch)
- Add haptic feedback throughout the app
- Add skeleton loaders to all list/feed screens
- Final polish: animations, transitions, empty states, toast notifications

To resume in a new chat: say "start session N" or "let's do session N" — Claude will have this plan saved in memory and will begin immediately without asking for context.
